# RESILIENT COASTS

## SUSTAINABLE FRAMEWORKS FOR CLIMATE ADAPTATION IN THE GULF OF GUINEA

---

The Belfer Center for Science and International Affairs  
Room B322

December 2–3, 2024

8:30 AM–4:30 PM

A keynote lecture and a series of panel discussions led by researchers examining climate adaptation strategies for the Gulf of Guinea. The workshop will explore integrated frameworks for sustainable coastal development, resilience building, and collaborative approaches to addressing climate challenges in the region.
